Abstracts

Feed grade vitamin C derivatives refer to compounds derived from vitamin C (ascorbic acid) that are suitable for use in animal feed and nutrition. These derivatives are specifically formulated and manufactured to meet the nutritional requirements of animals and to promote their health and well-being. Animals, like humans, require vitamin C for various physiological functions, but unlike humans, many animals are capable of synthesizing their own vitamin C. However, there are certain species, such as guinea pigs, certain birds, and fish, that cannot produce their own vitamin C and require dietary supplementation. Global main players in vitamin C derivatives industry are DSM, MacroCare Tech and CSPC Pharma.
