Abstracts

Fireproof foam is a special material, which is achieved by adding special chemicals to the foam material. Common colors are black and white. The reason why the fireproof foam is called fireproof is not that the foam can't burn, but that the chemical agent added in the foam material increases the ignition point of the material, making it more difficult to burn than the ordinary foam.

The global Fireproof Foam For Lithium Battery market size was estimated at USD 285.45 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 22.15% during the forecast period.
