## Abstracts

The flammable and explosive gas detector is a safety device specially used to detect the concentration of flammable and explosive gases in the air. It is widely used in industrial, commercial and residential environments to monitor and alarm the presence of flammable and explosive gases to protect personnel and property. These sensors are usually integrated with an alarm system, and when the detector detects that the gas concentration exceeds the set safety threshold, it will trigger an alarm, such as an audible alarm, a light alarm or provide an alarm signal by connecting to a security system. In this way, people can take measures in time to prevent fire or explosion accidents and protect life and property safety.
