Abstracts

Fleece fabric is a type of soft, insulating textile, often made from polyester. It was originally created during the 1970s by Polartec and has become increasingly popular ever since. Fleece is known for its soft texture, warmth, lightweight nature, and moisture-wicking properties. It is commonly used in outdoor and activewear, as well as home textiles such as blankets and throws. The fabric is typically brushed or knitted to create a fuzzy texture that traps air and retains heat. Fleece is popular due to its versatility, as it offers warmth without being heavy and is quick-drying, making it suitable for use in various climates and environments. At present, the market concentration of the fleece fabric industry is relatively high. Key players of fleece fabrics include Polartec, Shenli Textile, Quanzhou Haitian Material Technology, Shenzhou International, SHANGHAI CHALLENGE and so on. In terms of product types, the mainstream product on the market is single-sided fleece, but the market share of double-sided fleece is increasing.
