### Report Overview

Floating dryers, also known as floating clothes dryers or portable dryers, are compact, lightweight drying devices designed for small spaces or travel use. These units typically feature a collapsible or foldable design, allowing for easy storage and portability. Unlike traditional dryers, floating dryers often utilize low-heat or air-drying mechanisms to gently dry clothes without the need for large vents or high energy consumption. They are particularly popular in urban areas with limited space, among frequent travelers, and in regions with humid climates where line drying is impractical.
