### Report Overview

Fluorescein Sodium Strip is a medical diagnostic product designed for use in ophthalmic examinations. It consists of a thin, rectangular strip impregnated with a solution of fluorescein sodium, a fluorescent dye. The strip is used to detect any breaks or leaks in the cornea or the anterior segment of the eye by applying it to the surface of the eye. When exposed to a blue cobalt light, the fluorescein dye causes the affected areas to glow green, making it easier for healthcare professionals to identify and diagnose conditions such as corneal abrasions, ulcers, or foreign bodies in the eye. This product is typically used in conjunction with a slit lamp biomicroscope to provide a clear and detailed view of the eye's anterior segment.
