Abstracts

In the food and beverage industry, coding and marking equipment refers to specialized machinery used for printing information on product packaging. These devices apply text, numbers, symbols, or patterns on packaging materials through technologies like inkjet, laser, or thermal transfer to provide product information, tracking data, and enhance brand recognition. Within the food and beverage industry, two common types of inkjet printers are small character inkjet printers and laser marking machines. Small character inkjet printers use a non-contact inkjet method and are suitable for most requirements in the food industry. Laser marking machines provide clear and unalterable product identification, helping to prevent the malicious tampering of information.
