Report Overview

Fruit Flavor Capsule Cigarettes are a unique type of smoking product that combines the traditional cigarette experience with the added element of fruit flavors. These cigarettes are designed with a capsule within the filter that contains a liquid fruit flavoring. When the cigarette is smoked, the heat from the burning tobacco causes the capsule to break, releasing the fruit flavor into the smoke. This results in a distinctive and enjoyable taste that is different from standard tobacco cigarettes. The product aims to offer a more diverse and potentially less harsh smoking experience, appealing to those who prefer a milder or flavored alternative to traditional cigarettes. It is important to note that while the flavors may enhance the smoking experience, the health risks associated with smoking remain, and these products should be used with caution.
