Abstracts

Fuel Injection screw air compressor is a common industrial air compressor. It usually consists of the compressor body, motor, oil separator, oil cooler, oil filter, air cooler, control system and other parts. Among them, the compressor body is the core component of the oil-injected screw air compressor, which is mainly composed of the main engine box, rotor, stator, oil pump, cooler, etc. The motor is responsible for providing power, and the control system controls the operation of the entire compressor. When air is compressed, heat is generated. Oil-injected screw air compressors spray oil to cool and lubricate the compressor, improving the efficiency and life of the compressor.
