### Report Overview

Galvanized Rigid Steel Conduit (GRC) is a heavy-duty, corrosion-resistant piping system primarily used in electrical installations to protect wiring from physical damage, moisture, and environmental factors. Made from high-quality steel with a zinc coating, GRC provides superior durability, fire resistance, and mechanical strength, making it ideal for industrial, commercial, and infrastructure applications where long-term reliability is critical. Its rigid structure ensures structural integrity in harsh conditions, while the galvanized finish prevents rust and extends service life. GRC is commonly employed in construction, utilities, and hazardous environments where compliance with stringent safety and electrical codes is mandatory. The product's standardization (e.g., UL, NEC, and IEC certifications) ensures compatibility and performance across global markets.
