Report Overview

A Gear Metering System is a precise fluid dispensing and metering device that utilizes gear pump technology. It consists of two interlocking gears, typically made of metal or other compatible materials, that rotate within a chamber. As the gears mesh, they create tight seal zones, trapping and moving the fluid within the chamber. The amount of fluid dispensed is determined by the size and speed of the gears. Gear metering systems are commonly used in industries such as automotive, aerospace, and electronics manufacturing, where precise and controlled dispensing of adhesives, coatings, and other fluids is critical for quality and process control.
