Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on 1-Naphthaleneboronic Acid competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. 1-Naphthylboronic acid is an organoboron compound containing an aromatic naphthalene ring and a boronic acid group. It typically appears as a white or off-white crystalline solid with good thermal stability and moderate solubility. The boronic acid group in its molecular structure makes it active as an electrophilic reagent or coupling intermediate in organic synthesis, particularly suitable for C-C bond formation reactions such as Suzuki coupling. Due to this property, 1-naphthylboronic acid is widely used in OLEDs and pharmaceutical intermediates. Global production in 2024 was estimated to be approximately 430 tons, with an average selling price of US\$166 per kilogram. 1-Naphthaleneboronic acid relies on upstream raw materials such as naphthalene chemicals, boric acid, and boric acid esters. Its production process primarily involves the coupling reaction of boric acid with naphthalene derivatives, requiring stringent reaction conditions and purity control. As a typical organoboron compound, 1-naphthaleneboronic acid is primarily used in C-C bond formation processes such as the Suzuki coupling reaction. While this product is relatively niche, it plays an important role in pharmaceuticals and OLED synthesis, with demand primarily driven by downstream high-tech industries. With the growth of emerging industries such as innovative drug development and OLED displays, demand for 1-naphthaleneboronic acid remains robust, and the value of the 1-naphthaleneboronic acid industry chain is expected to further increase in the coming years.

The global 1-Naphthaleneboronic Acid market size was estimated at USD 71.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.90%

during the forecast period.
