## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on 18F-FDG (Fluorodeoxyglucose) competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. 18F-FDG (Fluorodeoxyglucose) is a positron-emitting radiopharmaceutical that contains no carrier and radioactive 2-deoxy-2-fluoro-D-glucose. It can be combined with positron emission tomography (PET) for diagnostic purposes. It is administered by intravenous injection. Glucose is one of the metabolic energy substances of the human body. Malignant tumor cells have a strong metabolism and metabolize glucose much more than normal cells. The radionuclide fluorine [18F] is labeled on deoxy sugar (DG), and its properties are basically the same as glucose and participate in cell metabolism. Using PET-CT to capture the 18F-FDG sugar metabolism of human tissue can detect the activity of tumor cells. The positron  $\beta^+$  emitted by the decay of 18FDG quickly collides with electrons to annihilate, emitting a pair of photons with equal energy (511keV) and opposite directions. 18F-FDG (Fluorodeoxyglucose) is suitable for positron emission tomography (PET) imaging to evaluate abnormal glucose metabolism to assist in the evaluation of malignant tumors in patients with known or suspected abnormalities found by other detection methods or patients with existing cancer diagnoses. Its use in specific medical scenarios highlights its importance in the field of treatment. It can be applied to early diagnosis of tumors, tumor staging, and tumor treatment evaluation. As China's medical level improves, the number of PET-CT equipment will continue to increase, thereby further releasing the demand for 18F-FDG.

The global 18F-FDG (Fluorodeoxyglucose) market size was estimated at USD 733.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 12.20% during the forecast period.
