Report Overview

2-Ethoxyethanol is a glycol ether solvent widely used in industrial and commercial applications due to its effectiveness in dissolving resins, oils, and waxes. It serves as a key ingredient in paints, coatings, inks, and cleaning products, offering a balance between water solubility and organic solvency. The market for 2-ethoxyethanol is driven by demand from the automotive, construction, and electronics sectors, where it is utilized in degreasers, adhesives, and semiconductor cleaning solutions. However, regulatory restrictions due to its toxicity and potential health risks, particularly in Europe and North America, have led to a shift toward safer alternatives, impacting market growth. Despite this, emerging economies in Asia-Pacific continue to witness steady demand due to rapid industrialization and less stringent regulations. Key players focus on product innovation and compliance with environmental standards to sustain competitiveness. Pricing trends are influenced by raw material costs (primarily ethylene oxide and ethanol) and regional supply-demand dynamics.

The global 2 Ethoxyethanol market size was estimated at USD 200.22 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 3.50% during the forecast period.
