Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on 2,2,4-Trimethyl-1,3-pentanediol Monoisobutyrate competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global production of 2,2,4-Trimethyl-1,3-pentanediol monoisobutyrate reached approximately 840 kilotons, with an average global market price of around USD 870 per ton. 2,2,4-Trimethyl-1,3-pentanediol monoisobutyrate (commonly abbreviated as TMPD-MIB) is an organic ester compound derived from 2,2,4-trimethyl-1,3-pentanediol and isobutyric acid. It is a clear, colorless to slightly yellow liquid with low volatility and good solvency, widely used as a coalescing agent and plasticizer in coatings, paints, adhesives, and inks. The compound enhances film formation in water-based systems by reducing the minimum film-forming temperature, thereby improving durability, gloss, and resistance to water, weather, and chemicals. Due to its balance of hydrophobic and hydrophilic properties, TMPD-MIB is valued in industrial applications for providing flexibility, stability, and enhanced performance in polymer formulations. The key market drivers for 2,2,4-Trimethyl-1,3-pentanediol monoisobutyrate (TMPD-MIB) stem from its critical role as a high-performance coalescing agent and plasticizer in waterborne coatings, adhesives, and inks, particularly as industries shift toward low-VOC and environmentally friendly formulations. Growing demand in the construction, automotive, packaging, and industrial sectors is fueling its use due to its ability to enhance film formation, durability, and chemical resistance in paints and coatings. Regulatory pressures on reducing volatile organic compounds, coupled with rising adoption of water-based technologies, further boost market growth. Additionally, the expansion of infrastructure projects, rising demand for advanced performance coatings in emerging

economies, and continuous innovations in polymer and adhesive technologies drive sustained demand for TMPD-MIB globally.

The global 2,2,4-Trimethyl-1,3-pentanediol Monoisobutyrate market size was estimated at USD 733.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.50% during the forecast period.
