Abstracts

3D AOI is a new type of testing technology emerging from the emerging world, but it has developed rapidly. Many manufacturers have introduced AOI testing equipment. 3D AOI enables precise inspection and measurement of the height dimension of devices on the PCB and provides clear side-view images of ICs and various devices. When it is automatically detected, the machine automatically scans the PCB through the camera, collects images, and compares the solder joints tested with the qualified parameters in the database. After image processing, the defects on the PCB are checked, and the defects are displayed/marked through the display or automatic signs.

The global 3D Automated Optical Inspection Aoi market size was estimated at USD 674.52 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 16.00% during the forecast period.
