Abstracts

China is the largest consumption area for three-dimensional fabrics, followed by North America and Europe. In the past few years, the price of products has been on a downward trend due to the popularity of the market. However, due to the impact of raw material costs, there has been an increase in certain years, especially in 2021. Raw materials have skyrocketed. However, in order to stabilize their regular customers, three-dimensional fabric companies have chosen to sacrifice part of their gross profits to cope with the market. Rise in raw material prices. The three-dimensional fabric industry has a high threshold and requires certain production technology. At present, the main advantageous enterprises are in China, the United States, Europe and other countries. New investments require large amounts of capital, making it difficult for small businesses to enter the industry.
