Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on 3GO Plasticizer competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. 3GO plasticizer, also known as triethylene glycol diethylhexanoate, is a solvent-based, cold-resistant plasticizer with excellent low-temperature resistance, durability, oil resistance, UV resistance, and antistatic properties. It also has low viscosity and moderate lubricity. Global production reached 246,900 tons in 2024, with an average selling price of \$3,790 per ton. The main raw materials for this product are 2-ethylhexanoic acid and triethylene glycol. The rapid expansion of the downstream market for 2-ethylhexanoic acid in the past two years has fueled strong growth for the product. Triethylene glycol is a product derived from ethylene refining, and its price is highly correlated with crude oil prices. Major triethylene glycol manufacturers include large refining and chemical companies such as Hengli Group, Sabic, North Huajin Chemical Industries, Nippon Shokubai, etc. Looking at downstream development, the booming automotive and construction industries are driving rapid growth in laminated safety glass for vehicles and high-rise buildings. 3GO plasticizers, as a specialized plasticizer for laminated film, are also expected to experience rapid growth. GO plasticizers are a new, environmentally friendly plasticizer that contains no benzene rings, is harmless, inexpensive, and offers effective additives. They can serve as an alternative to traditional plasticizers, improving the safety of related products.

The global 3GO Plasticizer market size was estimated at USD 936.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 8.20% during the forecast period.
