Report Overview

The 4-stroke engine is an internal combustion engine that completes a power cycle in four distinct strokes?intake, compression, power, and exhaust?delivering efficient and reliable performance. It is widely used in automotive, marine, industrial, and power generation applications due to its fuel efficiency, lower emissions, and durability compared to 2-stroke engines. The market is driven by increasing demand in the automotive sector, stringent emission regulations promoting cleaner technologies, and the growth of small-engine applications like generators and agricultural equipment. Key players include Honda, Yamaha, Briggs & Stratton, and Kohler, competing on innovation, fuel efficiency, and compliance with environmental standards. Emerging markets in Asia-Pacific and Latin America show strong growth potential due to industrialization and rising disposable incomes, while mature markets focus on upgrading to hybrid or electric alternatives. Challenges include competition from electric powertrains and fluctuating raw material costs.

The global 4 Stroke Engine market size was estimated at USD 12764.28 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 3.42% during the forecast period.
