Abstracts

4-tert-Amyl phenol or para-tertiary Amyl phenol (PTAP) is used in the manufacturing of phenolic resins which are then utilized in paints, coatings, varnishes, and printing ink resins. 4-tert-Amylphenol is used as a germicide and fumigant; intermediate for organic mercury germicides, pesticides, and chemicals used in the rubber and petroleum industries. Plastic additives, also known as plastic additives, are some compounds that must be added to improve the processing performance of polymers (synthetic resins) or to improve the performance of the resin itself when it is molded. Plastic additives is an associated industry of the plastics industry, and its development level is closely related to the development of the plastics industry. At present, the world's enterprises engaged in the production of plastic additives are distributed in Asia, Europe, the United States and other continents. Due to their strong financial strength, broad technology, and long time in related industries, large international manufacturers are mostly engaged in the production of various plastic additives. The chain is longer, and the production of high-end plastic additives accounts for a large proportion. Due to the low cost of labor in Asia and the huge market size, the world's plastic additives industry has gradually shifted to Asia, and Asia, especially China, has gathered most of the manufacturers. Therefore, China has played an important role in the rapid growth of plastic additives in recent years, becoming the largest and fastest growing market in the world. In recent years, with the wide application of plastics, the global plastic additives industry has achieved rapid growth. In the past few years, the demand for plastic additives in the world has continued to grow at an average annual rate of about 3-4%. The average annual growth rate of demand in Europe, North America and Asia Pacific (excluding China) is 3%. The average annual growth rate of plastic additives in China The growth rate is as high as 8%-10%, and the average annual growth rate of demand in other regions is 5%-6%. It is predicted that in the next period of time, the plastic additives market will still grow at a rate of 3%-4%.

The global 4-Tert-Amylphenol market size was estimated at USD 814.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.50% during the forecast period.
