## Abstracts

The 51.2T Switch ASIC is an advanced network chip with high integration and excellent performance. With its ultra-large switching capacity of 51.2Tbps and high port rate, it provides the ultimate bandwidth support for data transmission and processing. The chip adopts a precise nano-process technology, and the number of internal transistors is as high as tens of billions. With its high efficiency and programmable characteristics, it not only realizes low-latency data exchange, but also adapts to a variety of complex application requirements. In addition, its unique simplified transceiver design and excellent energy efficiency ratio enable it to process more data traffic at the same power consumption, showing excellent performance advantages and energy efficiency. In March 2023, Marvell launched the Teralynx 10, a programmable switch chip known as the "lowest latency in the industry". It is designed for the 800G era and has a switching capacity of 51.2Tbps. It aims to solve the ultra-high bandwidth needs of operators and is suitable for the leaf-spine topology of data center networks. Nvidia has launched a 51.2Tbps Switch ASIC with a port rate of 800G. It is based on a 4nm process technology and has more than 10 billion transistors built in. It is specially designed for AI applications and has a simplified transceiver design with a power of about 500W. Cisco launched the SiliconOne G200/G202 series of network chips for AI supercomputers in June 2023. The G200 has a switching capacity of 51.2Tbps and a port rate of 800G. Although the G202 has the same features as the G200, its switching performance is halved. The G200 uses a 5nm process technology with strong controllability and programmability, which improves the flexibility of usage scenarios. In August 2022, Broadcom released the industry's first commercial 51.2T capacity switching chip Tomahawk 5, which uses a 5nm process and is manufactured by TSMC. It uses a Monolithic bare die package and consumes less than 1W per 100Gbps.

The global 51.2T Switch ASIC market size was estimated at USD 1854.0 million in 2025

and is projected to grow at a compound annual growth rate (CAGR) of 5.30% during the forecast period.
