The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on 55% Al Galvanized Sheet competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Al Galvanized Sheet is a pre coated steel plate obtained by using cold-rolled steel plates of various strength and thickness specifications as the substrate, and then double-sided hot-dip coating with a layer of AL-ZN coating. The coating composition is composed of 55% aluminum, 43.4% zinc, and 1.6% silicon by weight. The production process of aluminum zinc coated steel plate is similar to that of galvanized steel plate and aluminum plate, which is a continuous molten coating process. Aluminum zinc coated steel plates with 55% aluminum zinc alloy coating have superior corrosion resistance compared to galvanized steel plates of the same thickness when exposed to the same environment on both sides. The aluminum zinc coated steel plate with 55% aluminum zinc alloy coating not only has good corrosion resistance, but also has excellent adhesion and flexibility of color coated products. Mainly used in construction: for roofs, walls, soundproof walls, pipelines, and modular houses. Automobile manufacturing: used for mufflers, exhaust pipes, wiper accessories, fuel tanks, truck boxes, etc. Home appliances: such as refrigerator backboards, gas stoves, air conditioners, electronic microwave ovens, LCD frames, CRT explosion-proof strips, LED backlight sources, electrical cabinets, etc. Agriculture: used for pig houses, chicken houses, grain warehouses, greenhouse pipelines, etc. Other: Hot section insulation cover, heat exchanger, dryer, water heater, etc.
