Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on 5G Camera competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. 5G cameras are next-generation intelligent imaging devices that integrate high-resolution optical modules, onboard AI processors, and 5G communication chipsets to enable real-time, low-latency, and high-bandwidth visual data transmission. Unlike traditional IP or 4G cameras, 5G cameras support uplink-intensive applications such as machine vision, smart city surveillance, industrial automation, autonomous logistics, and transportation monitoring by leveraging 5G's enhanced mobile broadband (eMBB), ultra-reliable low-latency communication (URLLC), and massive IoT capabilities. Equipped with edge AI computing (1.50 TOPS) and multi-sensor fusion technologies, 5G cameras can perform facial recognition, object detection, traffic analytics, defect inspection, and thermal-optical fusion analysis directly on the device. In 2024, global 5G camera production reached 16 million units, with an average selling price of US\$68, reflecting rapid adoption in both public and industrial sectors. The upstream supply chain includes image sensors (Sony, OmniVision), optical lens manufacturers, 5G communication modules (Qualcomm, MediaTek, Huawei), AI SoCs (Horizon Robotics, Ambarella), and device housing suppliers. Midstream manufacturers such as Hikvision, Dahua, Uniview, Huawei, Axis, Bosch, and Hanwha assemble the complete 5G camera with firmware, AI algorithms, and connectivity stacks. Downstream customers include smart-city integrators, telecom operators, factories, ports, power utilities, transportation authorities, and enterprise security operators deploying AIoT video networks.

The global 5G Camera market size was estimated at USD 1088.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 16.60% during the

forecast period.
