## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on 6061 Aluminum Plate competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. 6061 Aluminum Plate is a precipitation-hardened Al-Mg-Si alloy plate characterized by balanced strength, corrosion resistance and machinability, widely used for structural, load-bearing and precision-machined components. In 2024, production reached 82,143 ton and the average price was 2,800 USD/ton. Its upstream includes electrolytic aluminum ingots, alloying elements such as magnesium and silicon, and casting, hot-rolling and surface-treatment equipment, supplied by companies such as Alcoa, Rio Tinto, Chalco, and Yunnan Aluminum. The midstream consists of alloy melting, homogenization, hot-rolling, cold-rolling and finishing processes. Downstream demand comes from construction, automotive and marine sectors, with typical customers including Tesla, General Motors, SAIC Motor, and CSSC. In 2024, single-line capacity was about 500 ton, and the average gross margin was 16%. The market outlook for 6061 Aluminum Plate remains solid as global demand for lightweight, corrosion-resistant and high-machinability materials accelerates across transportation, construction and marine sectors. Structural upgrades in electric vehicles and next-generation architectural systems continue to favor medium-strength Al-Mg-Si alloys, where 6061 offers a cost-performance balance superior to many alternatives. Growth is also supported by the expansion of precision-machining industries and the rising adoption of modular fabrication methods that benefit from the alloy's dimensional stability. Over the next few years, incremental capacity additions and process optimization are expected to stabilize supply while downstream substitution from steel and heavier alloys provides sustained momentum.

The global 6061 Aluminum Plate market size was estimated at USD 230.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 8.80% during the forecast period.
