Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on A1AR Antagonists competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. A1AR antagonists are a class of drugs that act on the adenosine A1 receptor (A1AR). By blocking adenosine binding to the receptor, they inhibit signaling, thereby regulating various physiological processes such as heart rate, neurotransmission, renal function, and sedation. These antagonists have potential therapeutic value in areas such as heart disease, neurodegenerative diseases (such as Alzheimer's disease), and chronic pain. Representative drugs include caffeine and novel small molecule compounds. Sales volume in 2024 will be 178,000 units, with an average price of US\$600 per unit. The production capacity of this product is greater than 100,000 units per year, depending on the customization quantity, with a gross profit margin of 75%.

The global A1AR Antagonists market size was estimated at USD 106.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 8.50% during the forecast period.
