Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Abalone Food competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Abalone food refers to various food products made from abalone as the main ingredient, processed and prepared into different forms. These products typically include canned abalone, vacuum-packed abalone, dried abalone, abalone sauce, and more, catering to different consumer needs. Abalone is rich in high-quality protein, trace elements, and various nutrients, offering significant nutritional value. Abalone food is widely used in premium dining and has become a popular choice in the convenience food market due to its ease of use and long shelf life, appealing to both households and the ready-to-eat food market. In 2024, the global production of abalone food is approximately 62,234.48 tons, with an average price of 29 USD/kg.
