Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Above Ground Pool competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Above Ground Pool is a type of swimming pool that is installed on the surface of the ground rather than being built into it. It typically consists of a prefabricated frame made of metal, resin, or composite materials, along with a durable liner to hold water. Above ground pools are usually easier and faster to install compared to in-ground pools, require less excavation, and are often more cost-effective. They come in various shapes and sizes, including round, oval, and rectangular, and may include additional features such as filtration systems, ladders, and safety covers. These pools are popular for residential use, temporary setups, or locations where in-ground construction is impractical.

The global Above Ground Pool market size was estimated at USD 829.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 14.10% during the forecast period.
