Report Overview

Abyssinian oil, derived from the seeds of the *Crambe abyssinica* plant, is a lightweight, fast-absorbing, and highly stable plant oil rich in erucic acid, making it a prized ingredient in the beauty and personal care industry. Known for its emollient properties, it enhances skin and hair hydration without leaving a greasy residue, making it particularly popular in high-end skincare, haircare, and cosmetic formulations. The market for Abyssinian oil is driven by increasing consumer demand for natural, sustainable, and multifunctional ingredients, particularly in clean beauty and vegan products.
