The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on AC Circular Saw competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global production of AC circular saws reached 21.181 million units, with an average selling price of US\$57.5 per unit. The annual production capacity of a single AC circular saw production line was approximately 1.0086 million units, with a gross profit margin of approximately 22.6%. An AC circular saw is a portable electric saw powered by AC electricity and widely used for cutting materials such as wood and metal. It is typically equipped with a rotating saw blade, allowing for fast and precise cutting of various materials. Upstream raw materials for AC circular saws include AC motor stators/rotors, magnetic materials, and insulating materials, among others. The midstream consists of AC circular saw manufacturers, while the downstream primarily serves domestic, commercial, and various industrial applications. The current AC circular saw market maintains stable growth, primarily used in woodworking, construction, and furniture manufacturing. With technological advancements, products are increasingly moving towards lightweight, high-precision, and multi-functional designs, such as laser-assisted cutting and electronic speed control, to meet users' demands for efficiency and precision. Market competition is fierce, with international brands like Bosch, Makita, and DeWalt dominating the high-end market, while domestic brands are gradually expanding their market share in the mid-to-low-end market through their cost-effectiveness. Simultaneously, environmental policies are driving increasing demands for product energy efficiency and safety, prompting companies to increase investment in technological research and development.

The global AC Circular Saw market size was estimated at USD 1218.0 million in 2025

and is projected to grow at a compound annual growth rate (CAGR) of 4.10% during the forecast period.
