### Report Overview

DIN guideway power supplies are based on a series of standard guideway power supplies created by the German Institute for Standardization (DIN), Germany's national standards organization. This power supply converts alternating current (AC) to direct current (DC) at various ranges. The end user can obtain the desired DC output power by using various Settings of the power supply. The power supply is easy to install and requires little or no maintenance. Due to the advantages of the guideway power supply mentioned above, downtime is kept to a minimum and does not affect plant efficiency and production. DIN guide rail power supply is mainly used in industrial automation control, light industry, instrument and meter, process control and other fields.
