Report Overview

AC-DC medical power supplies are AC-DC power supplies used in the medical industry, such as AC-DC power supplies used in clinical medical equipment and personal health care equipment. This type of power supply is subjected to high-voltage rectification and filtering to obtain a DC high voltage, which is used for the DC/DC converter to obtain one or several stable DC voltages at the output. The power ranges from several watts to several kilowatts. More and more advanced medical equipment has been widely used in various medical situations. Because of the particularity of medical equipment, as an important part of it, medical power supplies have more stringent requirements than other power products. At present, switching power supplies are more commonly used in medical equipment.
