Report Overview

Financial close software, also called accounting close software, provides tools to help businesses complete the financial close cycle. Many organizations perform financial close at the end of each month, during which accountants within an organization use this software to ensure the books are accurate and any transactions were successfully completed. Tasks, such as bill payment and delivery, expense approval, and lead importing, will be laid out in checklists and checked off once completed. Financial close products often include features such as individual task allocation, reconciliation management, and databases of past accounting close data organized by month and transaction type.
