Report Overview

Accumulator pistons are mainly used for regulating the performance and operation of the hydraulic system. Accumulator piston consists of following parts gas valve, end cap safety device, end cap piston, sealing system cylinder ,extended seal ,end cap safety device and fluid connection. Fluid section of accumulator piston is connected to the hydraulic circuit so that piston draws in a fluid and pressure is increased, this will cause compression of gases. Accumulator pistons are energy storing device under very high pressure. Accumulator pistons are suitable for flow fluctuations, dampening pump pulsation and absorbing hydraulic shocks. Accumulator pistons is applicable for long service life, maximum efficiency and dependable performance.

The major driving factor of accumulator piston is oil and gas industry because demand of crude oil is significantly increasing year by year. Another industries that drives the accumulator piston market are industrial hydraulic power units, machine tool industry, automotive industry and marine and offshore industry. Some strict rules and regulations set up by the several governments for safety purposes, which also drives accumulator piston market. There are some restraining factors of accumulator piston market are such as, volatile pricing of piston also affects the market and large volume covered by piston. Regular monitoring of piston position and pre back up configuration are also restraining factors. Other restraining factors are to withstand with very high volumetric ratio and rapid discharge of fluid is also a serious cause. There are some opportunities of accumulator piston such as, in power generation sector this pistons can be used for energy management, other sectors are mining, mobile construction, agricultural and railway and road transportation. There are some latest trends in accumulator pistons are such as, nowadays accumulator pistons comes with temperature tolerance system, sensors which acts as a monitoring unit and high compensation ratio is maintained in pistons.
