Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Acetylpyrazine competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global Acetylpyrazine production reached approximately 1 Kilotons, with an average global market price of around US\$ 82K per ton. Acetylpyrazine is a chemical compound with the molecular formula $C_6H_6N_2O$. It is a yellowish liquid with a nutty, roasted, or popcorn-like odor. It is commonly used as a flavoring agent in food and beverages, particularly in products that aim to replicate the taste of roasted or toasted foods. Acetylpyrazine is also used in the production of fragrances and as an intermediate in the synthesis of other organic compounds.

1. Safety & Regulatory Status
Food Safety: Recognized as safe (GRAS) by the FDA (U.S.) and approved as a food additive (E161f) by the EFSA (EU). In China, it is listed in GB 2760-2014 as a permitted flavor enhancer, with a maximum usage level of 0.1-1.0 mg/kg in most foods (varies by product type).
Toxicology: Low acute toxicity (oral LD₅₀ in rats >5,000 mg/kg). No evidence of carcinogenicity, mutagenicity, or reproductive toxicity at recommended doses.
Regulatory Compliance: Suppliers must meet regional standards (e.g., FCC [Food Chemicals Codex] for the U.S., Ph.Eur. for Europe) for purity and impurity limits.

2. Development Trends & Challenges
Trends: - Shift toward green production: Increased investment in biological synthesis to meet consumer demand for "natural" additives. - Expansion in high-value applications: Growth in pharmaceutical intermediates and natural flavor markets. - Regional market growth: Rising demand in Southeast Asia and Africa due to urbanization and processed food consumption.
Challenges: - Raw material price volatility (e.g., acetylacetone, 1,2-diamines) affects production costs. - Stringent regulatory requirements for food/pharmaceutical grades (e.g., limits on residual solvents, heavy metals) increase compliance costs. - Competition from alternative flavor

agents (e.g., natural roasted extracts, other pyrazine derivatives like 2,3-dimethylpyrazine).

The global Acetylpyrazine market size was estimated at USD 83.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.80% during the forecast period.
