Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Acetylsalicylic Acid API competitive dynamics, regional economic interdependencies, and supply chain reconfigurations.Acetylsalicylic acid, also known as aspirin, is a salicylic acid drug commonly used as an analgesic, antipyretic, and anti-inflammatory. It can also be used to treat certain inflammatory diseases. It is one of the most widely used medications in the world today, listed on the World Health Organization's Model List of Essential Medicines and essential for basic public health systems. This study focuses on the acetylsalicylic acid API market. In 2024, global acetylsalicylic acid API production reached approximately 55.86 k mt, with an average global market price of around US$ 25.27 per kg. Salicylic acid is the most direct intermediate in the synthesis of acetylsalicylic acid. China is a major global producer of salicylic acid, with a concentration of large-scale enterprises. Hebei Jingye Chemical Co., Ltd. is one of the largest salicylic acid production bases in China. According to official information, its products are not only supplied to the domestic market but also exported to Japan, the United States, Russia, and other countries and regions. Ganzhou Maoyuan Pharmaceutical Co., Ltd. also produces industrial salicylic acid and salicylic acid-related products (such as methyl salicylate) and engages in domestic and international trade. Huayin Jinqiancheng Pharmaceutical Co., Ltd. holds production qualifications for salicylic acid and aspirin. Following restructuring, it has the capacity to produce thousands of tons of industrial and pharmaceutical salicylic acid annually. Its main downstream customers include Bayer, Shandong Xinhua Pharmaceutical, and Jilin Pharmaceutical. Some of these companies, such as Hebei Jingye Chemical, also leverage their salicylic acid raw material resources to directly produce finished aspirin. Major global manufacturers have a combined production capacity of approximately

info@marketpublishers.com

77,000 tons, with an industry average gross profit margin of 30%-40%.The current (2025) market price of acetylsalicylic acid API is approximately RMB 30 per kilogram. This demonstrates that for mature chemical drugs, raw material costs are not a significant component of the total formulation cost. In the tenth round of China's national centralized procurement, the price of a 100mg enteric-coated aspirin tablet dropped to as low as 3.4 cents, a 92.85% decrease compared to before the centralized procurement. This indicates significant pressure on the price of finished formulations.

The global Acetylsalicylic Acid API market size was estimated at USD 1412.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 2.80% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Acetylsalicylic Acid API market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights.
