Report Overview

An acoustic piano is, in a sense, as old-school as one can get. It has hammers and steel strings that are enclosed by a wooden exterior. The keys are connected to the hammers. When a key is pressed, the hammer moves and strikes the strings, causing them to vibrate and produce the sound. There are two types of acoustic pianos: the grand piano and the upright piano. A grand piano has a frame and strings that are extended horizontally. It has a longer body and thus takes up more space. After playing the keys and releasing your fingers, gravity resets the keys and brings them back to their resting positions. In this report, we mainly study acoustic grand piano.
