Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Action Camera Stabilizer competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, the global production of Action Camera Stabilizer is 6 million units, with an average selling price of US\$100 per unit. An action camera stabilizer is a device designed specifically for action cameras, designed to maintain steady footage during intense activity or unstable environments. It typically utilizes a three-axis gyroscope, a motor drive system, and an attitude control algorithm. By sensing the camera's motion in real time and compensating for it, it eliminates shake, vibration, and offset, ensuring smooth, clear footage. Stabilizers not only improve video quality but also enable multi-angle shooting, intelligent tracking, and time-lapse photography. They are widely used in extreme sports, outdoor adventures, vlogging, and filming. With the advancement of AI algorithms and sensor technology, modern stabilizers now feature advanced features such as intelligent recognition, automatic framing, and remote control, making them an indispensable accessory for action imaging equipment. The action camera stabilizer market is experiencing a period of dual acceleration driven by both technology and application expansion. Upstream core components such as gyroscope chips, motors, and control algorithms are highly concentrated in Taiwan, Japan, and the United States. Technological barriers primarily lie in algorithm optimization and response speed. Downstream consumer demand is increasingly diverse, expanding from extreme sports enthusiasts to vloggers, tourists, and law enforcement recorders. The online e-commerce-focused channel model is now integrating co-branding with offline experiences. Future development will focus on intelligent upgrades, lightweight modular design, and cross-device ecosystem integration. The market will also penetrate into business-end scenarios such as security, education, and cultural tourism, forming a

broader ecosystem of professional solutions.

The global Action Camera Stabilizer market size was estimated at USD 602.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 8.80% during the forecast period.
