Report Overview

The adapter sheet laser welding machine is a special equipment for laser welding the adapter sheet with other materials. An adapter is usually a thin sheet of metal or plastic component used to connect or transition different components or structures. The laser welding machine uses the high energy density of the laser beam to generate instantaneous heat energy in the welding area, so that the adapter piece and other materials can be melted and bonded to achieve a reliable connection. This welding method has the advantages of small weld seam, small heat-affected zone, and fast welding speed, and is widely used in automobiles, electronics, aerospace and other fields.
