Report Overview

Attention deficit hyperactivity disorder (ADHD) is one of the most common childhood neurodevelopmental disorders, affecting approximately 3.3 million children and adolescents between the ages of 12 and 17 years old. This condition comes with symptoms that can affect everyday life for those diagnosed with it, such as difficulty paying attention, getting along with others and sitting still. While a cure for ADHD is currently unavailable, there are a myriad of treatment options available that can help manage symptoms. Treatment plans can vary depending on the individual, but finding resources that aid in ADHD care—such as mobile apps—can help. Certain apps, even if not created with ADHD in mind specifically, may help improve organization skills, aid in enforcing daily habits and routines and help users focus.

The global ADHD Apps market size was estimated at USD 1795 million in 2023 and is projected to reach USD 4937.82 million by 2032, exhibiting a CAGR of 11.90% during the forecast period.

North America ADHD Apps market size was estimated at USD 568.01 million in 2023, at a CAGR of 10.20% during the forecast period of 2024 through 2032.

This report provides a deep insight into the global ADHD Apps market covering all its essential aspects. This ranges from a macro overview of the market to micro details of the market size, competitive landscape, development trend, niche market, key market drivers and challenges, SWOT analysis, value chain analysis, etc.
