Report Overview

The electric welding sealant is pre-applied on the overlapping parts of the steel plate welding, and the gap is filled after spot welding to ensure sealing and prevent rust. Spot weld sealant is even more indispensable for those parts that are masked after assembly and difficult to apply weld sealant. This type of adhesive mainly includes resin-based sealants based on PVC weld sealants and rubber-based electric welding sealants based on styrene-butadiene and butyl rubber. PVC seam sealant is a heating hard paste coating made of polyvinyl chloride as the main component, mixed with fillers, plasticizers, additives, etc., with excellent sealing, water resistance, shock resistance and beautiful appearance. The product is non-corrosive to the body and can be matched with various primers.
