Abstracts

Adult webtoons are digital comics that explore more mature and explicit themes, typically intended for readers over 18. These webtoons often include content such as romance, sexuality, complex interpersonal dynamics, and sometimes darker or more intense subject matter like psychological drama or violence. The themes are more mature in nature, addressing real-life situations, emotional complexities, and sometimes fantasy or sci-fi worlds with adult-oriented storytelling. Adult webtoons can range across genres, including romance, thrillers, fantasy, and drama, often featuring well-developed characters and intricate plots that appeal to an older audience. These stories provide an avenue for creators to explore taboo or sensitive topics in a safe, creative way. Popular on platforms with age-restricted content sections, adult webtoons offer readers a wide range of experiences that go beyond traditional narratives, often pushing boundaries in terms of storytelling, art, and character development. The adult webtoons market is growing steadily, driven by the increasing demand for more mature and diverse content in the digital comic space. This segment caters to audiences seeking stories with explicit themes, complex relationships, and darker narratives, often covering genres like romance, thriller, and fantasy with adult-oriented plots. The rise of subscription-based platforms and age-restricted content sections on popular webtoon apps like Lezhin Comics and TopToon has allowed creators to explore more freedom in storytelling while ensuring proper content moderation. As adult webtoons become more accepted and mainstream, there is a trend toward higher production values, sophisticated art styles, and cross-platform adaptations. However, balancing regulatory challenges and ensuring responsible content distribution will be key as the market continues to expand globally.

The global Adult Webtoon market size was estimated at USD 3246.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.50% during the forecast period.
