Abstracts

Advanced IC (Integrated Circuit) packaging is a critical technology in semiconductor manufacturing that focuses on improving the performance, efficiency, and form factor of electronic devices. As chip designs become more complex and power demands increase, advanced IC packaging techniques have become essential. The Advanced IC Packaging Solutions catalog includes advanced IC packaging design software tools and advanced IC packaging processing services.Overseas mergers and acquisitions in recent years have allowed Chinese packaging and testing enterprises to quickly gain access to technology and markets, make up for some structural deficiencies, and greatly promote the upward development of China's packaging and testing industry. China's IC packaging industry started early and developed quickly, but is still dominated by traditional packaging. Although in recent years China's local advanced packaging and testing four strong (JCET Group, TongFu Microelectronics Co,Ltd, Tianshui Huatian Technology Co, China Wafer Level CSP Co., Ltd) through independent research and development and mergers and acquisitions, has basically formed the industrialization of advanced packaging capacity, but from the advanced packaging revenue accounted for the proportion of total revenue and high-density integration and other advanced packaging technology development, China's overall advanced packaging technology level and the international leading level there is still a certain gap.

The global Advanced IC Packaging Solution market size was estimated at USD 13250.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.70% during the forecast period.
