Abstracts

Adventure motorcycles are motorcycles that ride reasonably well on paved roads and also on non-paved roads. This motorcycle needs to have a strong frame and sub-frame to be able to carry a passenger and/or travel gear. This motorcycle will need a reasonable tank size, commensurate to its fuel consumption so you ride some 200 miles before needing a refuel. This motorcycle needs to be reasonably reliable, requiring limited maintenance and be easily serviceable. More suspension, beefier frames, crash bars, larger tank sizes, mean that in general adventure bikes will be heavier than a non-adventure version of a similar motorcycle. According to the report, one of the major drivers for this market is the growing popularity of long-distance touring and experiential traveling. The growth of the adventure motorcycles market is based on the growing popularity of long-distance touring. It has been observed that adventure motorcycles are better equipped with amenities required for long-distance touring. Most riders in this segment are aged between 50-54 years, followed by 45-49 years and 55-59 years. These motorcycles are expensive averaging a price more than \$20,000, with clothing and gear adding another \$3,000. Hence, younger riders may find it difficult to afford. However, the adoption rate of adventure motorcycles has rapidly increased as they fulfill most of the rider's requirement in long-distance touring as well as on asphalt.

The global Adventure Motorcycles market size was estimated at USD 2163.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.90% during the forecast period.
