Report Overview

Aerogel insulation sheet is a type of thermal insulation material that is made from aerogel. Aerogel is a very lightweight, highly porous material that is made using a gel that has been dried to form a solid. It is known for its exceptional insulating properties due to the fact that it has a very low thermal conductivity. Aerogel insulation sheets are typically very thin and flexible, making them easy to install in a variety of applications where space is limited. They are often used in building insulation, aerospace applications, and industrial applications where high temperatures need to be managed. Aerogel insulation sheets are also resistant to moisture, fire, and chemicals, making them ideal for use in harsh environments.
