Report Overview:

Aerospace fasteners are the hardware components or devices that are used to mechanically combine two or more objects together or to connect parts of an aircraft during aftermarket servicing and original equipment manufacturing. Aerospace fasteners are durable and secure and aid in enhancing the aircraft's efficiency while reducing its overall weight. They are commonly manufactured using aluminum, titanium and steel, owing to the high tensile/shear strength and corrosion resistance of these metals. These fasteners are used for creating non-permanent joints that can be dismantled or removed without damaging the surrounding equipment. Owing to this, they find extensive applications in assembling commercial and military aircraft, rockets, ballistic missiles and satellites.

The Global Aerospace Fasteners Market Size was estimated at USD 4222.78 million in 2023 and is projected to reach USD 5221.04 million by 2029, exhibiting a CAGR of 3.60% during the forecast period.
