Report Overview

An aerospace service trolley is also known as airline meal trolley, airline catering trolley, or trolley cart is a little cart stashed up by an air carrier for operating by the cabin crew members inside the aircraft for passenger service by food, beverages and other items for the duration of a flight. Containers and trolleys used in the commercial aircrafts are believed as a division of aircraft galley, mainly understood by the umbrella term galley inserts. Small storage boxes as cabins are fixed in the airplane galley for storing up small items, for example, ice and food among others whereas trolleys are used to deliver the food and beverages to the passengers inside the aircraft cabin. The galley is the compartment of an aircraft where food is prepared and cooked. This might also signify or represent a particular design of a household kitchen or to a land-based kitchen on a naval base.
