Abstracts

Aflatoxin B1 Rapid Test Kits are immunochromatographic assays designed for the rapid, on-site detection of aflatoxin B1—a highly toxic and carcinogenic mycotoxin produced by certain *Aspergillus* molds—in agricultural commodities such as grains, nuts, spices, and animal feed. These kits typically utilize competitive lateral flow technology, where a sample extract migrates along a test strip containing immobilized antibodies; if aflatoxin B1 is present above a predetermined threshold, it competes with a labeled conjugate for binding sites, resulting in a visible control line with reduced or absent test line intensity, providing qualitative or semi-quantitative results within minutes without the need for specialized equipment.

The global Aflatoxin B1 Rapid Test Kit market size was estimated at USD 85.5 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 7.80% during the forecast period.
