## Abstracts

Agarose gel cell culture medium is an agarose-based culture medium used for in vitro cell culture experiments. Agarose is a natural polysaccharide that forms a gel-like substance by gelling at the appropriate temperature. In cell culture, agarose gel can provide the supporting structure required for cell growth and provide an appropriate microenvironment for cells to promote their adhesion, proliferation and differentiation. Because of its good transparency and biocompatibility, agarose gel is often used in various cell culture experiments, such as cell proliferation, cell migration, cell adhesion, etc. With the rapid development of biomedicine, biopharmaceuticals and other fields, the demand for cell culture media continues to grow, and the agarose gel cell culture media market is also showing a rapid growth trend. Afterwards, with the further development of biomedicine, biopharmaceuticals and other fields, as well as the continuous expansion of emerging fields such as cell therapy and tissue engineering, the demand for agarose gel cell culture media will continue to grow.

The global Agarose Gel Cell Culture Medium market size was estimated at USD 183.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.10% during the forecast period.
