Abstracts

Agricultural e-commerce refers to the process of using modern information technology (Internet, computer, multimedia, etc.) to provide production and business entities engaged in agriculture-related fields to complete online sales of products or services, purchases, and electronic payment business transactions. Agricultural e-commerce is a brand-new business activity model. It makes full use of the ease of use, wide area, and interoperability of the Internet to achieve fast and reliable networked business information exchange and business transactions.Agricultural e-commerce, also known as agri-tech e-commerce, indeed represents an innovative and transformative approach to conducting business within the agricultural sector. This model leverages modern information and communication technologies, such as the Internet, computers, and multimedia platforms, to facilitate a range of commercial activities, including sales, purchasing, and electronic payments related to agricultural products and services.Key features and aspects of agricultural e-commerce include:Online Sales and Purchases: By harnessing digital platforms, agricultural producers, suppliers, and buyers can engage in virtual transactions for a wide array of agricultural commodities and inputs, such as grains, livestock, equipment, fertilizers, and seeds.Efficient Information Exchange: The use of Internet-based systems enables rapid and reliable exchange of business-related information, including product specifications, pricing, availability, and market trends, leading to enhanced transparency and decision-making within the agricultural supply chain.E-Payment Facilities: Agricultural e-commerce platforms typically offer electronic payment mechanisms that simplify financial transactions between the involved parties, streamlining the process of buying and selling agricultural goods and services.Market Access and Expansion: Agricultural e-commerce broadens market reach by providing a digital marketplace that transcends geographical limitations, enabling both local and global trade in agricultural products and services.Operational Efficiency: By digitizing elements of the agricultural supply chain,
