## Abstracts

Agricultural vinyl, as the name implies, is vinyl used for agricultural purposes and is used for plastic greenhouses and tunnels. Agricultural vinyl is mainly made of polyvinyl chloride (PVC) or vinyl chloride resin. There are various types of vinyl with different characteristics, such as heat retention, moisture retention, and dustproofing, etc. By selecting the appropriate vinyl according to the crops to be grown and the characteristics of the climate, it is possible to improve work efficiency, increase yield, and suppress pests and diseases. Agricultural vinyl is used as a covering material to cover the posts when building plastic greenhouses or tunnels. In both cases, agricultural vinyl should be set up on poles in a sunny, windless location and secured with vinyl rails or packers.
